

Eyeline

Video Surveillance Software

For business and home use, Eyeline is ideal for video monitoring of offices, buildings, retail stores, and as home security for monitoring property, entrances, pets and children's rooms.

Easily record a single security camera or manage a 100+ camera system. View camera footage on site or from a remote location. Compress and archive recorded surveillance video files. Use automatic motion detection on individual cameras.

Features

- Records up to 100+ camera sources simultaneously
- Easily set up each camera with just a click of a button
- Works with both USB cameras and networked IP cameras
- Motion detection recording
- Email or SMS alerts available for motion detection
- Optional time stamping of recorded video frames

System Requirements

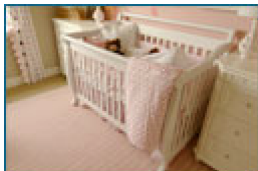

- Windows XP/Vista/7/8
- Camera(s) with Windows drivers
- Adequate USB (or other) ports for cameras

Business Surveillance: Create a video surveillance system to monitor activity in and around your business or retail store

Home Security: Capture only the activity near your home, boat, shed or other property with motion activated recording.

Nanny Cam: Easily transform a webcam into a nanny camera to peek in on your child, babysitter or even your pets.
